Application/Control Number: 09/746,676

Art Unit: 2133

1. Claims 9, 19 and 25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As per claims 9 and 25, lines 1-3, "wherein which of said at least one test access port...during operation" is not clear as to what it means.

As per claim 19, line 2, "...are further arranged..." is not clear how they are arranged so as to allow testing of the at least one circuit....

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claims 1-37 are rejected under 35 U.S.C. 102(e) as being anticipated by Swamy (6,686,759).

As per claims 1-4 and 6-17, Swamy discloses techniques for testing embedded cores in multi-core integrated circuit designs, comprising:

A multi-core processor and

At least one test control mechanism, including at least one test access port controller and a plurality of distributed data and control registers; wherein the multi-core processor and the test control mechanism having a configuration so as to allow testing of the multi-core processor. (See Figs. 1 and 2; and col. 7, line 10 to col. 8, line 39).

Art Unit: 2133

As per claim 5, Swamy further discloses the at least one test control mechanism is substantially compliant with the IEEE 1149.1 specification. (See col. 14, lines 35-37).

- 4. Applicant's arguments with respect to claims 1-37 have been considered but are moot in view of the new ground(s) of rejection.
- 5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phung My Chung whose telephone number is 703-305-9686. The examiner can normally be reached on Monday to Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Albert Decady can be reached on 703-305-9595. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
